

Remove It, Don't Move It!

Reimagine the way you clean restrooms, patient rooms, operating rooms, entryways, lobbies, kitchens, and other areas commonly cleaned with the same mop.

- Would you ever consider using these to clean your floors?
- Do you feel chained to your current method of floor cleaning?
- Do you ever think of the soil, germs, bio load and residue that are moved around, or even left behind?

It Is Time To Embrace A New Solution!

Compact Auto Scrubbers in areas traditionally cleaned with mops:

- Increase productivity by reducing trips to and from the supply closet.
- Superior cleaning results are achieved by actually removing the soil from the surface instead of spreading and re-depositing it.
- Floors will be left dry and safe to walk on in a fraction of the time.
- Worker ergonomics will be greatly improved by eliminating the need to clean with cumbersome tools and lift heavy mop buckets.
